EDUCATION

BTech(Hons) RV University : School Of Computer science Engineering	09/2023 – Present Bangalore, India
Pre university Canara Vikass Pre University College 12th PUE Karnataka Percentage: 88.33 / 100	2021 – 2023 Mangalore, India
Schooling Sri Chaitanya Tecno School 10th CBSE Percentage: 66.80 / 100	2018 – 2021 Mangalore, India

SKILLS

Data Analysis With Python
Skilled In Data Analysis using python libraries

Database Management System
Skilled in designing, querying, and managing relational databases

C Programing
Foundation in low-level programming, and algorithm implementation

Teamwork
Comfortable with GitHub for version control and collaborating effectively in team projects.

Machine Learning
Experienced in building and evaluating models using Scikit-Learn for data analysis and prediction

Java OOPS
Basic Java Object Oriented Programing Skills

Web development
Have a strong grasp of HTML, CSS, and JavaScript for building and styling responsive web pages.

Cybersecurity
Strong skills in fundamentals of cybersecurity along with ethical hacking, network security, fundamental tools in cybersecurity

LANGUAGES

- English
- Hindi
- Kannada

PROJECTS

Multi Restaurant Management System

- Under Database Management System Course
- Built a base level multi resturant management system using python gui and MySQL workbench

Asteroid Game

- Under Building Applications With Python
- Successfully Built an aestroid game using python tkinter gui concepts

Data Analysis On Starbucks Dataset

- Under Data Analysis With Python Course
- Sucessfully analysed the starbucks dataset for understanding nutritional facts and trends

Secure File Sharing With Hybrid Encryption

- Under Mini Project
- A python based flask web application for a secure upload of files with hybrid AES+RSA encryption of data and JWT for user authentication

Analysis and Prediction of Video Game Sales using Machine Learning Algorithms

- Under Introduction to Machine Learning Course
- This project focuses on analyzing and predicting the sales of video games using various machine learning algorithms to gain insights and predict success based on sales performance.
